

Stand Together Now for Student Success!

We, the undersigned, are full-time and contingent faculty, students, and supporters of a quality higher education system. We recognize that in order for Washington State's colleges and universities to remain high quality, we must have the best working and learning conditions to ensure student success. It is critical that Washington State succeeds in implementing known best practices for these conditions.

Maintaining an outstanding higher education system requires that Washington State end the overreliance on contingent faculty who make up nearly 70% of the workforce. We urge you to significantly increase the number of part-time positions to more full-time, tenured positions, implement equity pay for these workers, and reform hiring standards to promote fairness, racial equity, and transparency.
